

MAT SCHMID

[mats.page](#) [schmidyy](#) [@matschmidy@gmail.com](mailto:matschmidy@gmail.com) [Ottawa, ON](#) [1-613-986-6623](#)

Focused on shipping and scaling large mobile apps. I care deeply about getting the small details right in everything I do.

EXPERIENCE

Senior iOS Developer @ [Square](#) 📅 July 2022 - Present

- Co-lead and primary iOS contributor on project to allow offline support for order creating and editing, which enables sellers in remote or low-connectivity areas to continue operating their business.
- Worked to converge all implementations of the cart module from all Point of Sale apps ([Square](#), [Restaurants](#), [Retail](#), [Appointments](#)) into a single modular and scalable module.

Senior iOS Developer @ [Shopify](#) 📅 May 2018 - July 2022

- Led project to reduce loading time of the order details screen (reaching 1M+ daily active users) by 40%.
- Converted a shipping label purchase flow from a web view to a mobile first and native experience, which improved its purchase conversion rate by 30%.
- Primary contributor and coordinator on projects such as [bulk order actions](#) and [local deliveries](#), winning a company-wide internal hackathon.

iOS Developer Intern @ [Shopify](#) 📅 May 2018 - August 2018

- Trusted as contributor on high visibility projects such as draft orders and multi location inventory.
- Helped run development workshops and gave iOS related talks at events hosted by Shopify to aspiring mobile developers.

Student iOS Developer @ [SHOEBOX Inc.](#) 📅 May 2017 - April 2018

- Collaborated with backend engineers, designers, and QA to develop the hearing test screening app [Quicktest](#), while continuing to maintain the clinically validated audiometer app, [SHOEBOX Pro](#).

EDUCATION

Bachelor's of Computer Science, Honours @ [Carleton University](#) 📅 Sept 2014 - Dec 2018

Specialized in the Mobile Computing stream. Built a Scantron grading app, [Pocket Scantron](#), as my Honour's Project for professors to quickly grade their student's exam sheets.

ON THE SIDE

Loaf [Swift Package](#)

- Simple open source Swift package for displaying toasts in your iOS app. Created, built, and maintained individually, along numerous external contributions. 1k+ stars on GitHub and a [top trending repository](#).

SKILLS

UIKit SwiftUI Composable Architecture React Native Objective-C GraphQL REST APIs

See [mats.page](#) for a full list of projects. Thank you for your consideration!
